Leading market research specialists, eDigitalResearch are now taking up residence at Vanbrugh House, following yet another year of substantial growth, considerable expansion and a move to â€˜plcâ€™ status, reflecting the financial stature of the organisation.

The new office complex will house the ever expanding research and technical teams after the company saw a considerable increase in workflow as new and existing clients continue to realise the potential digital research has to offer.

Chris Russell, Founding Director of eDigitalResearch, comments,
â€œThis office move marks another big moment in eDigitalResearchâ€™s history. The new complex allows us to continue providing clients with invaluable research, as well as offering new and improved facilities, such as a fully equipped training room and multi methodology research amenities. The office also now provides the ability to host a larger technical infrastructure and will allow the team to continue providing invaluable insight to all our clientsâ€•.

The company are already looking to employ several new members of staff for its research, technical and business development teams, having already recruited Research Analysts Emma Gillingham and Craig Bright, as well as Junior Web Application Developer Heather Bickerstaff, in recent months to help with the addition of new accounts.

The increase in work flow also seeâ€™s several existing memberâ€™s of staff promoted, including Harry Gardner to Research Executive, Shaun Smith to Research Analyst, Naomi Greene to Senior Research Analyst, and Nada Gillard to Senior Research Manager.

Nada will now be responsible for managing the day to day running of a major grocery retailer account, overseeing a dedicated team of analysts and research executives.

2011 already looks set to become another groundbreaking year for the company, after coming 41st in the Sunday Times Best 100 Small Companies To Work For.
