Monday, 03 September 2012

DJS Research Ltd is pleased to welcome two new staff - Tessa Montague, who joins the company as a Research Manager, and Maria Royse, who joins in the newly created role of Business Development Executive. These appointments bring the number of permanently employed staff at the company to 33.

Tessa, who brings considerable experience in the pharmaceutical and healthcare sectors, represents the latest in a flurry of research orientated appointments at the rapidly growing Cheshire-based agency. Prior to joining DJS Research, Tessa worked as both a self-employed research consultant and for several leading market research companies including InforMed Insight, Adelphi International Research, Millward Brown, Factotum Consulting and Research Surveys. It is hoped Tessaâ€™s knowledge of the pharmaceutical sector will allow DJS Research Ltd to continue expanding their offer in to increasingly specialised industries .

Maria Royse joins the agency in a Business Development role. Maria has worked in similar roles for several leading design and marketing agencies in Manchester, most notably True North, Reform Creative and Onside Creative. Prior to this, Maria worked as a freelance designer â€“ specialising in packaging and corporate identity across a number of sectors including food and drink, engineering, electrical goods and heavy industry, working for companies such as McCann Erickson and TBWA.
