We are continuing to grow and recruit at DJS Research .

It's an exciting time, last year was another year of success for the company. Some key highlights include:

- We achieved the highest overall combined score on the Crown Commercial Services Framework (out of 500 companies)
- We won Stockport Business of the year
- Employed 10 new team members
- Conducted Research in 60+ countries

We are one of largest and fastest growing market research companies in the North West and we currently require further talented researchers to join the team. In particular we are currently very keen to hear from Research Managers or Senior Research Executives. Please see our careers page for further details and how to apply.
